## EDUCATION

|                                                                                                                        |         |
|------------------------------------------------------------------------------------------------------------------------|---------|
| <b>Bachelor of Science in Software Engineering</b>   GPA: 3.69   Cum Laude,<br><i>University of Texas at Arlington</i> | 05/2026 |
| <b>Associate of Science in Software Engineering</b>   GPA: 3.95, <i>Dallas College</i>                                 | 12/2023 |
| <b>Bachelor of Business Administration in International Business</b> ,<br><i>HCMC Open University, Vietnam</i>         | 09/2016 |

## SKILLS

|                                       |                                                                    |                                              |                                                                                  |
|---------------------------------------|--------------------------------------------------------------------|----------------------------------------------|----------------------------------------------------------------------------------|
| <b>Languages</b><br>PHP, Java, Python | <b>Frontend</b><br>HTML, CSS, React, Responsive Design, JavaScript | <b>Backend</b><br>PHP, Node.js, RESTful APIs | <b>Infrastructure</b><br>Raspberry Pi, Cloudflare Tunnel, Self-Hosted Deployment |
| <b>Tools</b><br>Git, GitHub, Linux    | <b>Databases</b><br>MySQL, MongoDB                                 |                                              |                                                                                  |

## PROFESSIONAL EXPERIENCE

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                                   |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------|
| <b>Crown Digital LLC (Metro Uniforms)</b> ,<br><i>Warehouse Manager (Software Development &amp; Automation)</i><br>• Built and deployed internal web applications ( <b>PHP, MySQL, JavaScript</b> ) replacing manual workflows<br>• Built ReceiveFlow system to digitize warehouse order processing<br>• Reduced order preparation time by <b>7x (1 week → 1 day)</b><br>• Built <b>RESTful APIs</b> for order validation, data processing, and audit logging<br>• Developed dashboard interfaces for non-technical staff using PHP and JavaScript<br>• Led 9+ employees; restructured workflows and training processes, improving team productivity by <b>20%</b> .<br>• Expanded role to oversee newly launched retail operations. Recognized with <b>5-Year Service Award</b> (2024). | 06/2021 – 03/2025   Dallas, Texas |
| <b>Crown Digital LLC (Metro Uniforms)</b> , <i>Warehouse Clerk   Inventory, Order Fulfillment</i><br>• Managed receiving, inventory, and order fulfillment with 99% accuracy. Identified inefficiencies that led to later system automation.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | 03/2019 – 05/2021   Dallas, Texas |
| <b>SS Logistics Co., Ltd (Song Song Logistics)</b> ,<br><i>Freight Sales Representative   International Freight, Sea &amp; Air Cargo</i><br>• Sold international sea and air freight services to import/export businesses; managed client relationships and coordinated with carriers.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | 08/2017 – 09/2018   Vietnam       |
| <b>RYLOGS International Transport Co., Ltd</b> ,<br><i>Operations Coordinator   Import Freight, Customs Clearance</i><br>• Managed end-to-end import freight operations including customs clearance, cargo release at seaport/airport, and ground transportation coordination.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | 11/2016 – 06/2017   Vietnam       |

## PROJECTS

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                   |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------|
| <b>ReceiveFlow – Warehouse Receiving System   Live Demo:</b><br><a href="https://namho-receiveflow.fortuneterm.com">https://namho-receiveflow.fortuneterm.com</a>  ,<br><i>PHP, MySQL, JavaScript, HTML, CSS, Google Charts</i><br>• Designed workflow solutions using spreadsheets, later transforming them into a full-stack system<br>• Built a full-stack warehouse workflow system using <b>PHP, MySQL, JavaScript and custom CRUD</b> to automate order receiving and sorting<br>• Processed and normalized <b>inconsistent source data</b> into a structured SQL database for accurate tracking<br>• Implemented <b>scan-based validation and routing logic</b> for embroidery requirements and organization classification<br>• Reduced processing time by <b>~7x (1 week → 1 day)</b> in real-world warehouse operations<br>• Developed <b>analytics dashboards</b> with CSV export for reporting and operational insights<br>• Designed and <b>deployed a self-hosted production system</b> on <b>Raspberry Pi</b> , enabling secure remote access via <b>Cloudflare Tunnel</b> | 09/2025 – 01/2026 |
| <b>BugHouse – UTA Senior Design Tutoring Platform   Project Page:</b><br><a href="https://websites.uta.edu/cseseniordesign/2026/05/01/bughouse-3/">https://websites.uta.edu/cseseniordesign/2026/05/01/bughouse-3/</a>  ,<br><i>React, Node.js, MongoDB</i><br>• Redesigned attendance report filtering by moving frontend date filtering logic to <b>backend API endpoints</b> using query parameters (`fromDate`, `toDate`)<br>• Implemented <b>MongoDB aggregation-based CSV reporting</b> for attendance records, tutor details, and tutor analytics<br>• Developed a <b>fully responsive mobile interface</b> across the platform, improving usability on smaller devices and completing a long-standing limitation from previous project iterations                                                                                                                                                                                                                                                                                                                                 | 08/2025 – 05/2026 |
| <b>Uniform Voucher Management System   Live Demo:</b><br><a href="https://namho-uniform-voucher-demo.fortuneterm.com">https://namho-uniform-voucher-demo.fortuneterm.com</a>  ,<br><i>PHP, MySQL, JavaScript, Google Charts</i><br>• Designed and built an internal voucher management system using <b>PHP, MySQL, JavaScript, and CRUD</b> to replace manual tracking workflows<br>• Reduced customer lookup time by <b>~5x (10–20 seconds → 2–3 seconds)</b> using search-based validation by name and organization<br>• Automated reporting workflows with <b>CSV export</b> , reducing report preparation time from <b>15 minutes to under 1 minute</b><br>• Eliminated risk of data loss by centralizing voucher tracking into a <b>digital system</b><br>• Developed <b>dashboard interfaces</b> for real-time voucher tracking, designed for usability by non-technical staff and new employees                                                                                                                                                                                    | 05/2025 – 07/2025 |
