EDUCATION

Bachelor of Science in Software Engineering GPA: 3.68, University of Texas at Arlington	05/2026
Associate of Science in Software Engineering GPA: 3.95, Dallas College	12/2023
Bachelor of Business Administration in International Business, HCMC Open University, Vietnam	09/2016

SKILLS

Languages PHP, JavaScript, Python,	Frontend HTML, CSS, React, Responsive Design	Backend PHP, Node.js, Express.js, RESTful APIs	Infrastructure Linux, Raspberry Pi, Cloudflare Tunnel, Self-Hosted Deployment
Tools Git, GitHub, Linux, Raspberry Pi, Cloudflare Tunnel	Databases MySQL, MongoDB		

PROFESSIONAL EXPERIENCE

Crown Digital LLC (Metro Uniforms), <i>Warehouse Manager (Software Development & Automation)</i> • Built and deployed internal web applications (PHP, MySQL, JavaScript) replacing manual workflows • Built ReceiveFlow system to digitize warehouse order processing • Reduced order preparation time by 7x (1 week → 1 day) • Built RESTful APIs for order validation, data processing, and audit logging • Developed dashboard interfaces for non-technical staff using PHP and JavaScript • Led 9+ employees; restructured workflows and training processes, improving team productivity by 20% . • Expanded role to oversee newly launched retail operations. Recognized with 5-Year Service Award (2024).	06/2021 – 03/2025 Dallas, Texas
Crown Digital LLC (Metro Uniforms), <i>Warehouse Clerk Inventory, Order Fulfillment</i> • Managed receiving, inventory, and order fulfillment with 99% accuracy. Identified inefficiencies that led to later system automation.	03/2019 – 05/2021 Dallas, Texas
SS Logistics Co., Ltd (Song Song Logistics), <i>Freight Sales Representative International Freight, Sea & Air Cargo</i> • Sold international sea and air freight services to import/export businesses; managed client relationships and coordinated with carriers.	08/2017 – 09/2018 Vietnam
RYLOGS International Transport Co., Ltd, <i>Operations Coordinator Import Freight, Customs Clearance</i> • Managed end-to-end import freight operations including customs clearance, cargo release at seaport/airport, and ground transportation coordination.	11/2016 – 06/2017 Vietnam

PROJECTS

ReceiveFlow – Warehouse Receiving System Live Demo: https://namho-receiveflow.fortuneterm.com  , PHP, MySQL, JavaScript, HTML, CSS, Google Charts • Designed workflow solutions using spreadsheets, later transforming them into a full-stack system • Built a full-stack warehouse workflow system using PHP, MySQL, and RESTful APIs to automate order receiving and sorting • Processed and normalized inconsistent source data into a structured SQL database for accurate tracking • Implemented scan-based validation and routing logic for embroidery requirements and organization classification • Reduced processing time by ~7x (1 week → 1 day) in real-world warehouse operations • Developed analytics dashboards with CSV export for reporting and operational insights • Designed and deployed a self-hosted production system on Raspberry Pi , enabling secure remote access via Cloudflare Tunnel	09/2025 – 01/2026
BugHouse – UTA Senior Design Tutoring Platform Project Page: https://websites.uta.edu/cseseniordesign/2026/05/01/bughouse-3/  , React, Node.js, Express.js, MongoDB, AWS SNS • Redesigned attendance report filtering by moving frontend date filtering logic to backend API endpoints using query parameters (`fromDate`, `toDate`) • Implemented MongoDB aggregation-based CSV reporting for attendance records, tutor details, and tutor analytics • Developed a fully responsive mobile interface across the platform, improving usability on smaller devices and completing a long-standing limitation from previous project iterations	08/2025 – 05/2026
Uniform Voucher Management System Live Demo: https://namho-uniform-voucher-demo.fortuneterm.com  , PHP, MySQL, JavaScript, Google Charts • Designed and built an internal voucher management system using PHP, MySQL, and JavaScript to replace manual tracking workflows • Reduced customer lookup time by ~5x (10–20 seconds → 2–3 seconds) using search-based validation by name and organization • Automated reporting workflows with CSV export , reducing report preparation time from 15 minutes to under 1 minute • Eliminated risk of data loss by centralizing voucher tracking into a digital system • Developed dashboard interfaces for real-time voucher tracking, designed for usability by non-technical staff and new employees	05/2025 – 07/2025
